online

I made time last Friday and unfortunately it did not happen, but MDCB briefed. We are also on Site this Tuesday or Monday next week I think. Let's tie up.

9:21 pm

Ok thanks 9:24 pm ✓✓

Today

Hon Minister thank you for leading the recent visit to the Cwihaba project. The project sponsors remain excited about the visit and anxious about the government response to their invitation for MDCB participation. I am particularly excited because the visit triggered a bonding hitherto very weak between Tsodilo Resources as the investor and the government as the regulator and potential investor and . You naturally come at the tail end of the process to make the final government investment decision on the project. Our anxiety in the process stems from the length of time that it has taken to get to this stage. It would help the project if the current process could be brought to a mutually satisfactory conclusion sooner rather than later given that we have been at it for nearly 2 years. All the best

6:41 pm ✓✓

Yes Sir, as soon as I am out of isolation this week, I will climb onto it. I am equally excited and will get some traction or not from all stakeholders, MDCB and Cabinet.
